Abstract:

The "Pharmacy Management System" has been developed to override the problems prevailing in the practicing manual system. This software is supported to eliminate and in some cases reduce the hardships faced by this existing system. Moreover this system is designed for the particular need of the company to carry out operations in a smooth and effective manner.

Functionalities provided by Pharmacy Management System are as follows:

- Provides the searching facilities based on various factors. Such as Pharmacy, Stocks, Inventory
- Shows the information and description of the Pharmacy, Stocks
- Maintains the database of customers.
- To increase efficiency of managing the Pharmacy, Medicines
- Editing, adding and updating of Records is improved which results in proper resource management of Pharmacy data.
- Maintain addresses of patients with ALI(COVID) symptoms to help in contact tracing.
- Generate Bill after purchase.

Softwares used :

Front end --> HTML, CSS, Java Script

Back end --> Django

Database --> MySQL
